

# Gossamer Albatross

Scale = 1:72

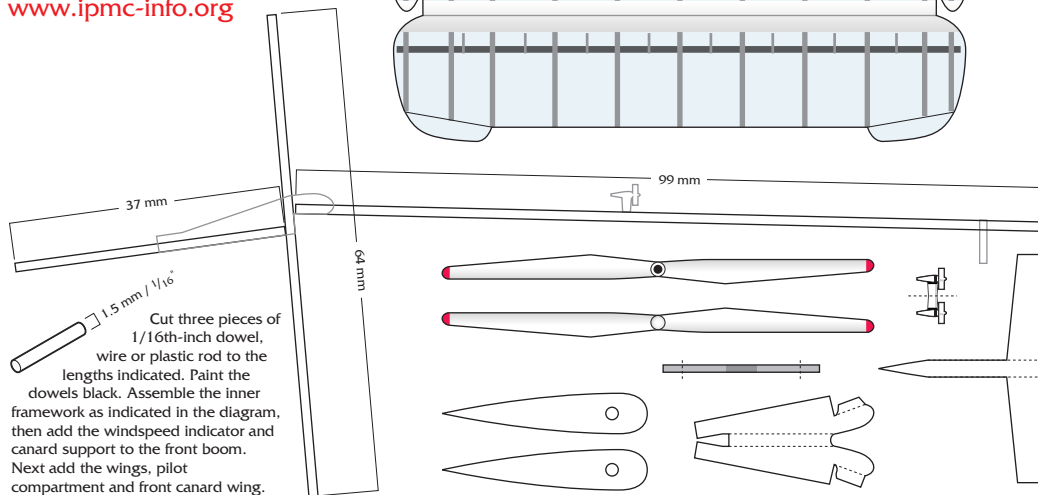

The annual Paper Modelers Convention takes place in Sterling, Virginia on October 22, 2011, where you can see amazing paper creations and meet paper modelers, designers and collectors.

After visiting the convention, stop at the Smithsonian Museum's Udvar-Hazy Center just down the road, to see the Gossamer Albatross, which made the first human-powered flight across the English Channel on June 12, 1979.
